

Dedicated Managed Servers

When purchasing our Dedicated Managed Servers, you receive a server-system of premium price and best possible quality.

All systems are multiply and redundantly connected to German carriers. Each system is protected by a Firewall that is designed to accommodate your specific safety- requirements. Our management supplies you with security-update installations as well as supplementing you with further services that are made available directly on your server.

If you are interested in our dedicated or managed-server, please fill out our contact form. We will then contact you with an appropriate and noncommittal offer.

Just ask us.
